

CF-96

Installation Manual

TOOLS REQUIRED (NOT SUPPLIED)

-When you're ready to start, make sure that you have the following tools to hand,
plenty of space and a clean dry area for assembly.
Two people are needed. Please note: although these instructions are comprehensive, we always recommend that a technically competent installer should undertake installation.

PRE-INSTALLATION AND TECHNICAL REQUIREMENTS

- All dimensions are shown in millimeters, except where otherwise indicated.
 - Ensure that the enclosure set is fitted to a level floor and vertical wall surface.
- Please note: The wall fixings included with this product are suitable for solid walls only.
- Plasterboard or stud walls may require specialist fixings (not supplied).

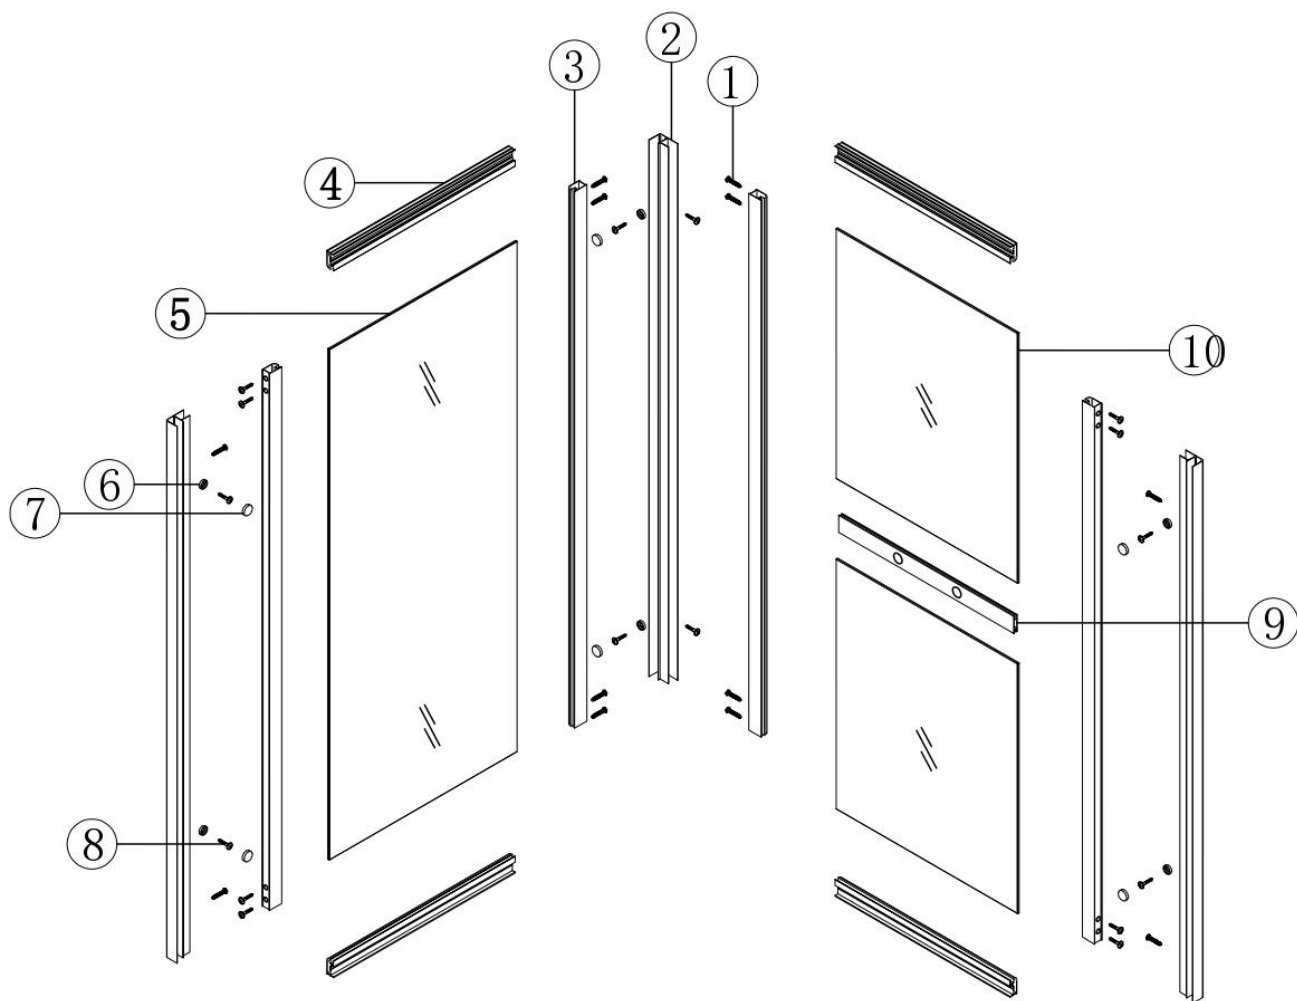

IMPORTANT SAFETY NOTES

- Please handle all glass with care, avoiding knocks and shock loading to all sides and edges.
- Safety glass cannot be reworked.
- Care should be taken when drilling into walls to avoid hidden pipes or electrical cables.

AFTERCARE INSTRUCTIONS

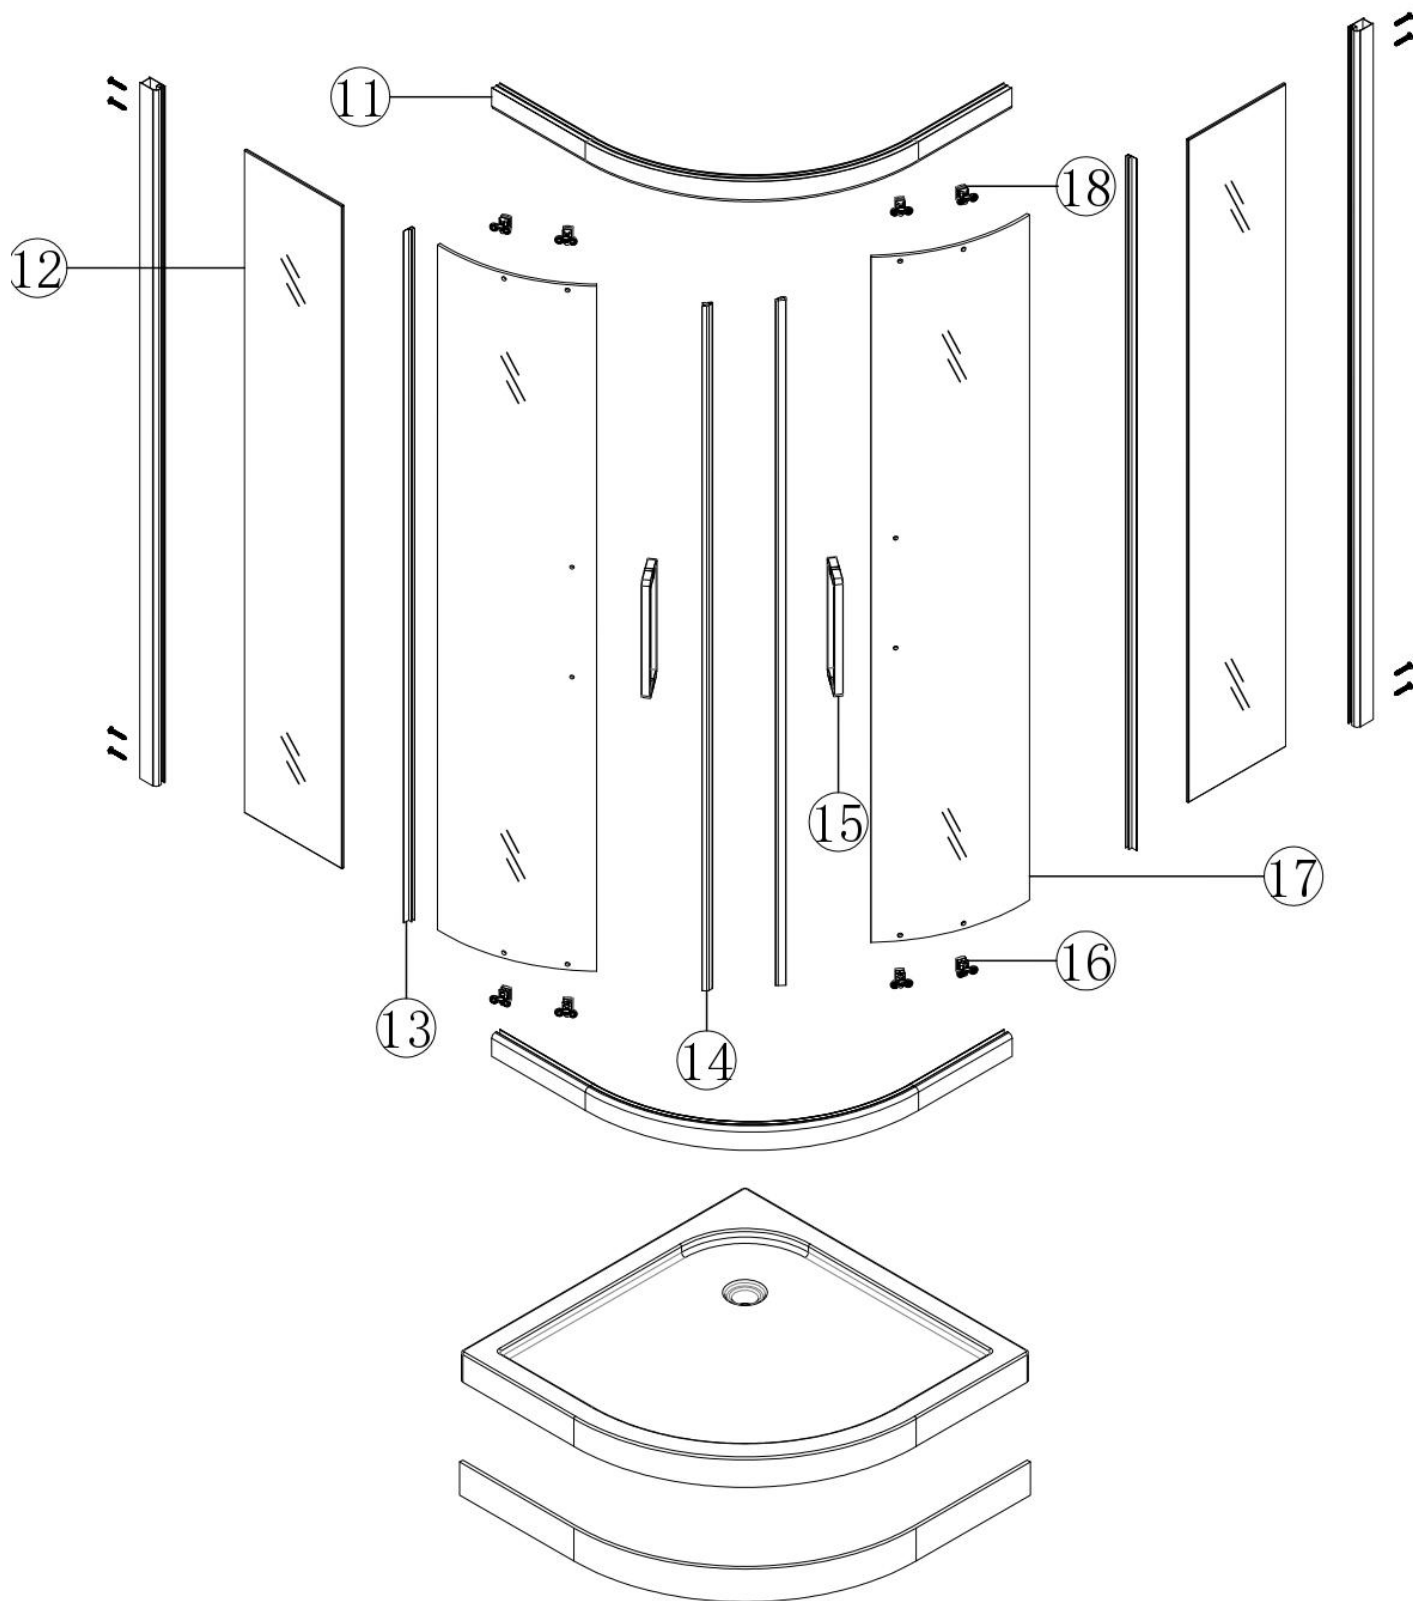

- Soap and water will be adequate to clean the glass - a glass cleaner can be used if required.
- In hard water districts, insoluble lime salts may be deposited on the glass. If this deposit is allowed to build up it becomes increasingly difficult to remove and looks unsightly. Regular cleaning will minimise this effect.

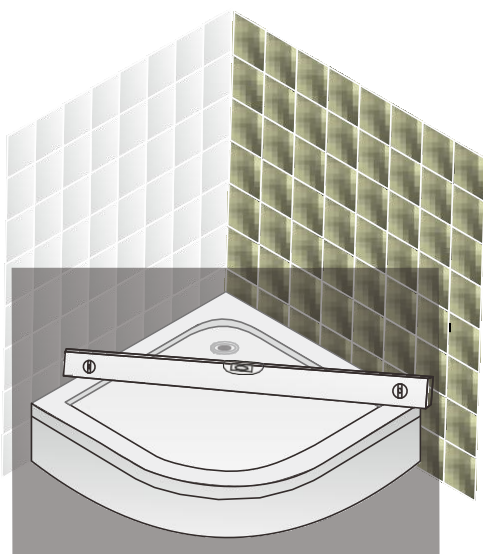

NO.	NAME	PICTURE	Qty	NO.	NAME	PICTURE	Qty
1	ST4*50		24	10	Side fixed glass		2
2	Corner material		3	11	Bent material		2
3	rim charge		6	12	Left and right fixed glass		2
4	Straight material		4	13	H water blocking		2
5	Side fixed glass		1	14	Magnetic attraction		2
6	Decorative cover base		6	15	handle		2
7	Decorative cover		6	16	Bottom wheel		4
8	ST4*10		6	17	Door glass		2
9	H material		1	18	Upper wheel		4

The shower mixer is not included in the package, you should buy it separately.

24 Hours

Clear drainage instruction

In order to prevent the drainage from blockage and dirty water, the users need to clean the tray after a certain time. Pull out the cover of the drainage, and then clear up the rubbish.

Precautionary and Maintenance

1. The hydraulic pressure of water supply should be between 0.1~0.4Mpa. The temperature of water must be below 60℃. There should be a separate switch for water supply.
2. Be careful when you carry glass made stuff.
3. Please keep the bottom tray clean. If any matter like hair blocks the drainage, please clean it as soon as possible.
4. Please do not clean the enclosure with acidity, strong alkalescency or organic liquid.
5. If the surface of enclosure is scratched, you can polish it with Number 1200 sand paper first and then polish it with No.2000 sand paper. At last, clean it with dishclout.
6. If silicone sealing at any part of the enclosure have come off, please fill it up as soon as possible.
